Introduction to Artificial Intelligence and Machine Learning Lab

(CSN12601)

Lab Assignment – 5

S. N.	Questions
1.	Write a Python program that reads a text file and extracts all unique words , then displays them in alphabetical order , ignoring case and punctuation.
2.	Write a Python program to demonstrate file input and output operations , including reading data from a file and writing processed content to another file.
3.	Write a Python program that copies the contents of one file to another, ensuring the original data remains unchanged.
4.	Write a Python program to read different file formats in Python, including CSV, Excel (.xlsx), TXT, TSV, and JPG files, using appropriate libraries and displaying relevant file information or content.
