Assignment-1

1. Write a C program to perform addition, subtraction, multiplication, and division of two integers.
2. Write a program in C that takes two integers from the user and prints the sum of those numbers.
3. Write a C program that accepts three integers from the user and finds the second largest number among them.
4. Write a C program to input base and height of a triangle and find area of the given triangle.
5. Write a C program to check whether the given integer is a multiple of 3.
6. C program to check whether the given integer is a multiple of both 5 and 7
