Assignment 4

Singly Linked List

1. Write a program in C to create a singly linked list of n nodes and count the number of nodes.
2. Write a program in C to insert a new node with value 15 at the beginning of the singly linked list.
3. Write a program in C to insert a new node in the singly linked list at the given position.
4. Write a program in C to insert a new node at the end of the singly linked list.
5. Write a program in C to delete the node at position p in the singly linked list.
6. Write a program in C to search for an existing element in a singly linked list.
